

React Remove PropTypes Transform

Baz.js

```
// in
const Baz = (props) => (
  <div {...props} />
);

Baz.propTypes = {
  className: PropTypes.string
};

// out
const Baz = (props) => (
  <div {...props} />
);
```

Transform Pure Class To Function

Baz.js

```
// in
class Baz extends React.Component {
  static propTypes = { ... };

  render() { ... };
};

// out
function Baz(props) { ... };

Baz.propTypes = { ... };
```
